

GREAT KISKADEE

•REC

00:00:00

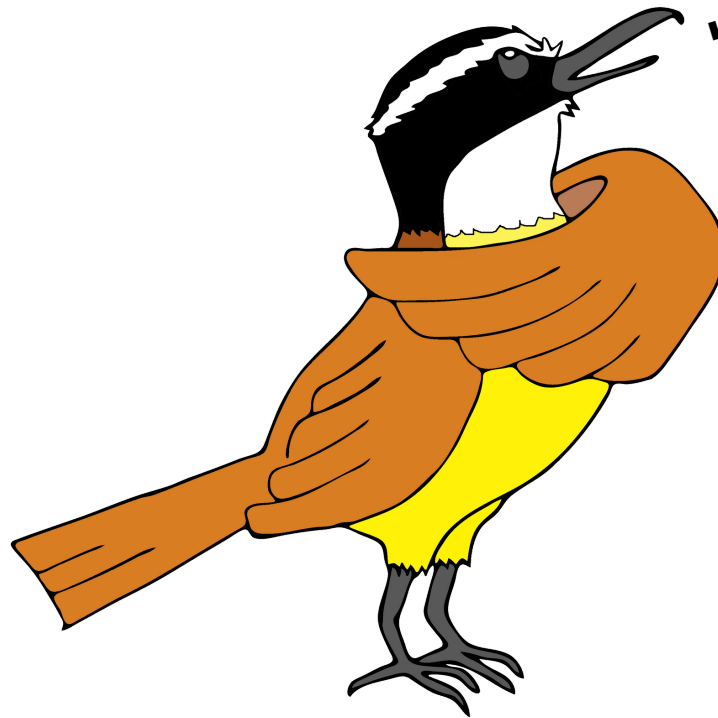

Scientific Name: Pitangus sulphuratus

Family: Tyrant Flycatchers

Size: 9 in (23 cm) 

Diet: Flying insects like beetles, wasps, moths and grasshoppers, but also seeds, mice, frogs, fish and lizards

KIS-KA-DEE 

*The most polite of all birds,
it will announce itself
to let you know it's there.
Named after the onomatopoeic
version of its loud three-note
call, it likes open spaces from
where to spot its prey.*

SQUIRREL CUCKOO

Scientific Name Piaya cayana

Family Cuckoos

Size 18 in (46 cm) 

Diet Caterpillars and other large insects, spiders and small lizards

00:00:00

Not likely confused, although you might mistake it for a squirrel since it hops among branches looking for a variety of food. Those rosy cheeks are proof of a healthy diet!

TURQUOISE-BROWED MOTMOT

BIRDS 

•REC

00:00:00

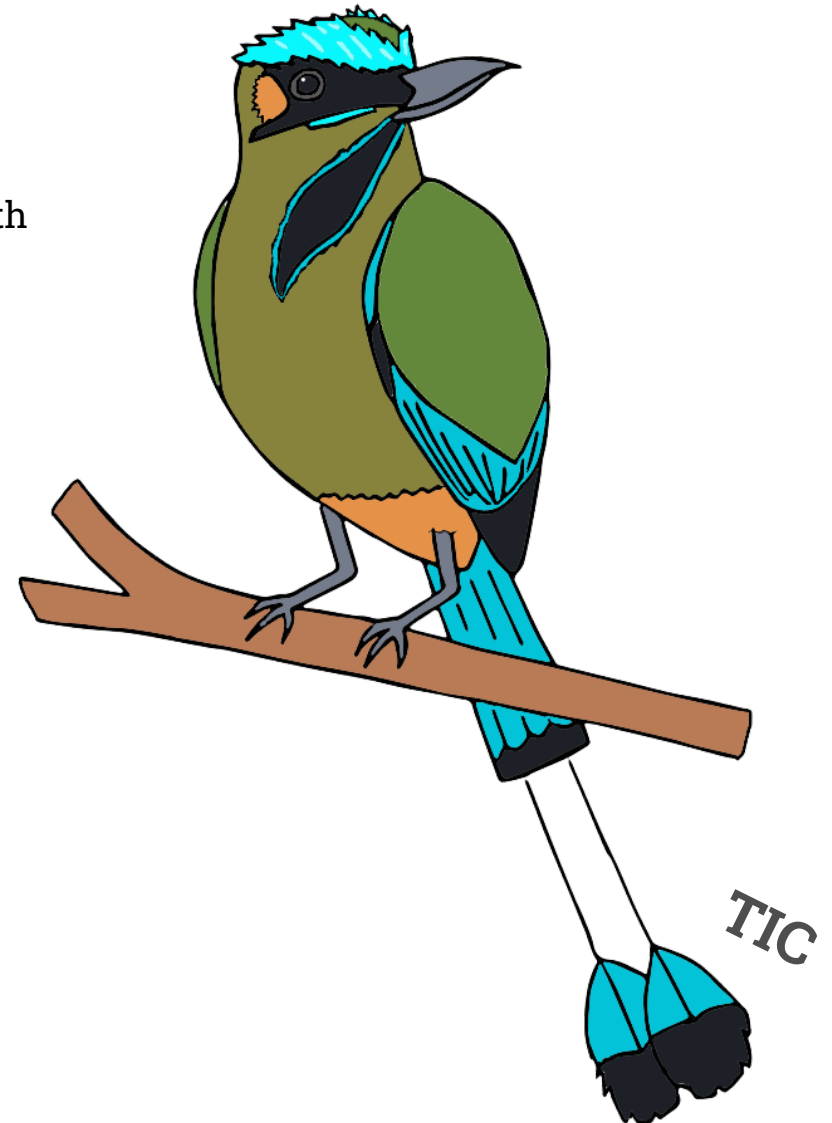

Scientific Name Eumomota superciliosa

Family Motmots

Size 13 in (33 cm) 

Diet Insects like caterpillars
butterflies and beetles, along with
worms, spiders and lizards

*The "Clock Bird"
according to a Mayan legend.
Punished for being lazy
and sleeping too much,
its tail acts like the hands
of a clock so that it is
never late again.*
